The Tradition Lives On

Innovation, Quality, Value, and Service

Protect your heritage

Every 5 seconds, an American home is burglarized. Will yours be next? Do you have peace of mind, knowing your possessions are safe when you are away from home?

Direct property loss from residential fires in the United States is estimated at \$11.3 billion each year. Are your prized possessions protected from fire?

On average, 9 children are killed each day in the USA by unintentional use of a firearm. Are your firearms safely locked away?

You've worked hard to acquire valuable assets that are important to you. Why risk losing them to fire or theft? Should the unthinkable happen and your home or office is burglarized or catches fire, a quality Heritage safe will protect your valuables, important documents, investments, and irreplaceable heirlooms from destruction. And, unlike a bank safe deposit box or secured storage facility, a Heritage safe provides convenient, ready access to your stored items, day or night, as they are shielded from prying eyes and opportunistic thieves.

We are fortunate to live in a country where the Bill of Rights guarantees the right to own and bear arms. With that right comes the responsibility to keep those arms secured from the grasp of criminals and to safeguard against accidental injury or death.

Protect your precious heritage by securing your valuables in a reliable and attractive Heritage safe. It's a responsible investment that you and your posterity will treasure for generations to come.

How can you afford not

For a dealer near you, visit our

with a Heritage safe.

Why are more and more people choosing Heritage safes over other brands? Because at Heritage we understand the value of preserving and protecting the things you hold dear. We take pride in offering the best-valued safes on the market without compromising security and quality.

Heritage Safe continues to set the standard in home security, value, and elegance. No matter what you choose to secure in your Heritage safe—heirlooms, guns, important documents, precious jewelry—we have the ideal make and model. Every Heritage safe is custom built to your specifications. We take extra care to ensure your satisfaction for a lifetime and provide you with superior customer service before and after the sale. We stand behind our products.

At a time when other safe manufacturers, in an effort to cut costs, are selling false security by building lighter safes that can be easily forced open, we at Heritage Safe refuse to compromise quality. We ensure that our safes are massive, strong, and enduring. Heritage safes are among the few in the industry that have met rigorous UL security certification. We set the standard by which all safes are measured.

Join the tens of thousands who have already found an affordable, responsible, and sensible way to safeguard their prized possessions in the convenience of their own homes with a Heritage safe.

Thank you for your interest in Heritage Safe products. We are committed to protecting your heritage from this generation to the next. You cannot put a price on real peace of mind.

Troy Nielsen, President

THE HERITAGE SAFE ADVANTAGE

- ▶ Heavier steel construction
- ▶ Thicker housing and door (4 times heavier)
- ▶ Thicker, longer locking bolts
- ▶ Superior fire protection
- ▶ Attractive and secure
- ▶ Heavier steel in door
- ▶ New Pyro-Shield fire door and ceiling barrier
- ▶ Patented pry-bolt technology
- ▶ New EZ utility door organizer
- ▶ Increased capacity
- ▶ More sizes, options, and features
- ▶ Exceptional warranty and service
- ▶ Nationwide dealer sales and support

“Recently my home was broken into by thieves who also tried to break into my Heritage safe. Through their unsuccessful efforts, the thieves damaged it to the point that it would not open. I called Heritage Safe and reported what had happened. They promptly replaced my safe and once again my valuables are secure. Purchasing a Heritage Safe is one of the best decisions I ever made.”

Heritage Safe Security Features

A CUT ABOVE THE REST

The name of the game in safes is to use heavy steel construction and impenetrable defenses to thwart thieves' attempts at forced entry. Given enough time and technology, any safe in the world—even the most secure bank vault—can eventually be breached. So the goal in safe-making is to make forced entry so difficult and time-consuming as to defeat any but the most determined and sophisticated thieves. It's a challenge Heritage Safe takes seriously!

The safe door is the primary point of attack. Heritage Safe Co. safe doors have 4 times as much steel as the industry standard. Additional standard features include:

- ▶ 1.25" diameter solid steel locking pry-bolts that extend a full 2" (twice as far as most brands) to lock securely behind the solid reinforced door frame, with precision 1/64" tolerances that improve long-term performance and fire protection
- ▶ Diam-a-Shield™ triple hardplate in the door, protecting critical areas
- ▶ Fully recessed door to frustrate prying
- ▶ Concealed internal ball-bearing hinges that make for smooth opening of the door, conceal the direction of opening, add to the attractiveness of the safe, and eliminate one of the most frequently attacked parts of the safe
- ▶ Diam-a-Shield™ solid hardplate shielding critical areas like lock and relockers in the door, providing 30 times the protection against drilling afforded by other brands
- ▶ Quad Sleeve™ automatic relockers that completely lock up the safe in response to impact, torch, or prying
- ▶ 4-way heavy positive deadlock locking mechanism that ensures that locking bolts cannot be forced to retract regardless of the side impact brought to bear on them
- ▶ UL-listed Group II Sargent & Greenleaf combination lock (the best in the industry) with key-locking dial that prevents intruders from even turning the dial
- ▶ Exclusive patented pry-bolt technology that secures the safe door against prying by clamping the safe body doorjamb in a pry attack

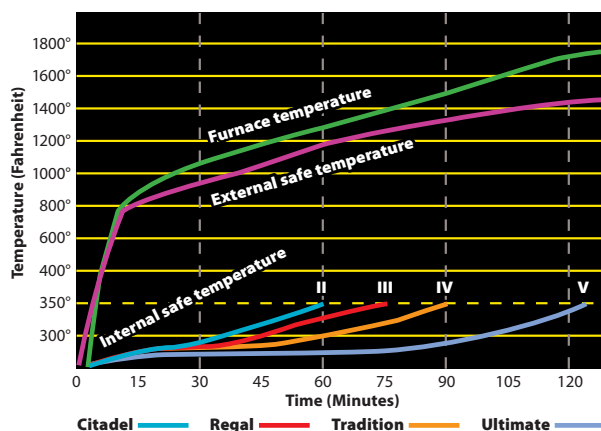

Additional recommended steps you can take to maximize the security of your safe and enjoy peace of mind:

- ▶ Securely bolt the safe to the floor.
- ▶ Install and activate home security systems.
- ▶ Place safe where it cannot be easily removed and where burglars cannot remain long without being detected.
- ▶ Check to make sure the locking bolts have fully engaged and that the safe is securely locked.
- ▶ Change the combination frequently, as needed.

ITR-Certified Fire Protection

Protecting your valuables from fire damage is just as important as protecting them from theft. Our revolutionary design of multiple layers of fireboard, dead-air space, and state-of-the-art welding techniques has raised the bar in fire protection. Our safes have been tested and certified in independent scientific testing facilities, passing the rigorous fire-endurance testing with flying colors. All of our standard safes come with fire protection that starts at 60 minutes in the Fortress Security Citadel and increases to an amazing 125 minutes in the Heritage Safe Ultimate line.

**ITECH THERMAL RESPONSE
FIRE CERTIFICATION RESULTS**

Our Ultimate, Tradition, and Regal safes take fire protection to the next level with our new double-step fire door. This allows us to add a second fire seal to the door frame for added fire and smoke protection, keeping your valuables more protected in the event of a fire.

Our Tradition and Ultimate safes take fire protection yet one step further with our unique Pyro-Shield thermal blanket—with a maximum temperature rating of 2300°F—placed in the ceiling of the safe, where it typically gets hottest during a fire, and in the door, which is usually the weak link in fire protection.

For complete fire certification results, see our Web site: www.heritagesafe.com

Seeing Is Believing!

"Recently, my family's life was turned upside down by a fire—something I never imagined could happen to me. The only bright spot, in addition to getting my wife and son to safety, was the fact that I had a Heritage safe."

A gas line leak created a huge explosion and fire in our home. At times the flames shot 20–30 feet above the house. The fire raged for almost four hours before the gas company could find the line and clamp it off. My Heritage safe stood only 20 feet from the center of the explosion, in what was undoubtedly the hottest part of the house. Although charred black, covered in debris, and standing in water my safe opened on the first try, and everything inside survived unscathed. Thanks to the Heritage Safe warranty I now have a brand-new safe.

My Heritage safe performed beyond belief—it's American craftsmanship at its best, and it's the best money I ever spent."

—JAY L. HOLLEMAN

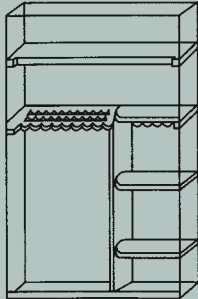

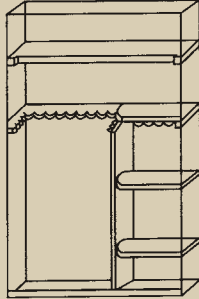

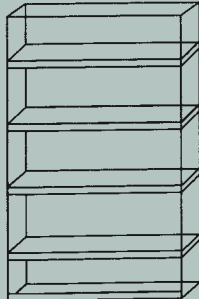

Holleman safe after nearly 4-hour fire.

When their home burned to the ground, Leroy & Judy Holsclaw of Milner, Georgia, lost everything—except the contents protected in their Heritage safe.

Interior Configurations

Select for your safe the interior configuration that is ideal for your storage needs. The table below shows the available configurations, the advantages of each, and the maximum gun capacity and number of shelves for each safe model.

	SPORT-EXPAND	EZ-EXPAND	EXECUTIVE
	 <p>Stores large number of rifles along with other valuables; rifle storage easily expanded</p>	 <p>Stores rifles and other valuables, with easier access to the guns; rifle storage easily expanded</p>	 <p>Adjustable shelves for general storage</p>

FSC 246021	21 (or 12) rifles 1 full shelf (+ 3 partial)	N/A	N/A

Figures in parentheses apply when the partial shelves are installed in the Sport-Expand and EZ-Expand interiors as shown in the diagrams. In the FSR 5072, guns are in the middle; partial shelves can be on either side or both sides.

Optional Accessories

Choose from among these handy optional accessories for your Heritage Safe Co. safe. Check our Web site, www.heritagesafe.com, for additional accessories.

EZ Utility Door Organizer

Store pistols and other items in this handy organizer that attaches to the inside of the door, yielding even more storage capacity. Standard in Tradition and Ultimate series.

Velcro® Pistol Holsters

Maximize storage with these versatile holsters that attach to the Velcro® strips on the EZ utility door organizer.

La Gard

Sargent & Greenleaf

Electronic Lock

Replace the standard mechanical combination lock with a convenient electronic combination lock by La Gard or Sargent & Greenleaf. The Sargent & Greenleaf lock allows separate combinations for different users.

Electric Dehumidifier

Keep your guns free from rust and your other valuables mildew-free with this electric dehumidifier.

Fluorescent Interior Light

Illuminate the interior of your Heritage safe with this convenient light. Features magnetic switch. Standard in Ultimate series.

Shelf Pistol Rack

Organize your pistols with this 8-gun pistol rack that rests on a shelf.

Black Chrome Trim

Upgrade any Fortress Security safe with black chrome finish on the dial and handle.

Magnetic Wildlife Images

Want to customize the exterior of your safe and show your enthusiasm for the great outdoors? These magnetic images are easily applied to the bottom of the door and just as easily removed without leaving a mark. See full selection at www.heritagesafe.com.

Best Safes, Best Warranties

When you choose Heritage Safe Co., you choose the best. Our unfailing commitment to quality and service extends beyond manufacturing. Should anything ever go wrong with your safe, you deserve the assurance that the manufacturer will stand behind its product. All our safes come with the most inclusive **standard warranty**, and we offer the best optional **extended warranty**, in the industry.

Standard Warranty

Heritage Safe Co. offers as its standard warranty a lifetime guarantee that includes:

- Repair or replacement of damage to safe from forced entry, forced attack, or fire damage
- Repair or replacement of damaged lock

The standard warranty also includes a 5-year guarantee against rust.

Subject to the conditions of this warranty, your safe will be repaired or replaced free of charge. The safe will be repaired on site if possible; however, if factory repair or replacement is necessary just return the damaged safe by prepaid freight along with a timely police report (in the case of damage from attack or fire). See warranty for complete details.

Extended Warranty

How do you improve upon the industry's best warranty? With the industry's best extended warranty. Available as an upgrade to your current warranty or with your new purchase, the Heritage Safe Co.'s extended warranty includes lifetime coverage for:

- In-home repair of manufacturing defects or of malfunctioning components
- Rust (for original owner)
- Malfunction of mechanical lock
- Repair or replacement guarantee

In the event that the safe needs to be returned for repair or replacement, FREE FREIGHT between your nearest dealer and our factory (both directions) is included.

Note: Warranty coverage does not include contents of the safe.

Warranty Service That's More Than Just Talk

"Last December my husband and I bought a safe to protect our valuables. All was well until we tried to get in it a few months later and couldn't. At Heritage Safe Company, Carol immediately assured us that the problem would be checked. Within just a few days a locksmith was located and the lock was assessed. When it was determined that the lock could not be fixed nor replaced without some loss of aesthetics, a new safe was ordered. When we asked about changing the type of lock, we were assured that that would be no problem and were graciously assisted in making those changes, and when there was a question about the type and color of finish that we had, samples were shipped for our verification. When the new safe was ready, Carol handled all of the arrangements for the pickup of the first safe and the delivery of the new safe. Even though the defective lock was not the fault of Heritage Safes, Carol and the customer service department of Heritage Safes were there for us. They bent over backwards to ensure that our problem was dealt with as quickly as possible and did so without hesitation. We truly appreciate the courteous manner in which Carol and Heritage Safes worked with us; the customer service at Heritage Safe Company can't be beat. Thank you Carol; thank you Heritage Safes."
